Summary

Creative and detail-oriented Frontend Developer with a strong foundation in JavaScript, React, and responsive design. Actively engaged in collaborative coding communities and open-source projects. Passionate about building immersive UI experiences, ethically-aware web applications, and projects blending design with interactivity. Adept at working in high-paced environments and building thoughtful user-centered solutions.

Technical Skills

Languages & Frameworks: JavaScript, HTML5, CSS3, React, Tailwind CSS
Tools & Platforms: GitHub, Replit, CodePen, Vercel, Figma, OpenAI API
Other: Responsive Design, Accessibility (a11y), Ethical Hacking (Beginner), UX Writing, Project Collaboration

Certifications

- freeCodeCamp – Responsive Web Design Certification
- freeCodeCamp – JavaScript Algorithms and Data Structures Certification
- freeCodeCamp – Front End Development Libraries Certification
- freeCodeCamp – Data Visualization Certification
- freeCodeCamp – Machine Learning with Python Certification
- freeCodeCamp – Foundational C# with Microsoft Certification

Projects & Experience

- Collaborative Journal App (Hackathon Project)

Built responsive frontend using React and Tailwind CSS. Integrated journaling logic and component-based UI. Focused on accessibility, clean design, and user engagement.

- Crypto Tracker App

Created real-time dashboard tracking 100+ cryptocurrencies. Implemented sorting, search, and historical chart features. Integrated with CoinGecko API.

- Keno Web3 Token Game

Smart contract deployed on Ethereum network. Wallet connection, ERC-20 tokens, and daily faucet logic. Styled interface with dark mode and animated UI.

- Whisper Crawler (Accessibility Scanner)

Node.js + Puppeteer tool to detect ARIA whisper traps and risky a11y patterns. Flags keyword bait, long aria-live misuse, misleading roles. Frontend with React for public scanning and export.

Education

Self-Taught via freeCodeCamp, open-source contributions, hackathons, and personal projects
